Summary

AI/ML engineer who designs, builds and deploys machine-learning systems, from LLM agents and document AI to computer vision. I take ideas from prototype to tested, production-ready services, and care as much about reliable engineering as about the models themselves.

Experience

AI Engineer, *Gems Pathways, Karachi* Jul 2026 – Present

- Built **PortraitPass**, a service now in production that checks student ID photos and removes their background. GitHub · Live demo
- Built **MCQ Studio**, an LLM service that writes exam questions from textbooks and extracts them from past papers, now being integrated into the company's learning portal. GitHub
- Built **Smart Form Filler**, a desktop tool that automates repetitive data entry from spreadsheets into web portals. GitHub

Junior Solution Engineer, *Squarera, Karachi* Oct 2025 – Jun 2026

- Built and automated enterprise ETL integrations in Boomi, and tested OData APIs with Postman.
- Optimised SQL transformations for faster, analytics-ready data.

Freelance Data Scientist, *Online Dimensions, remote* Jul 2024 – Jun 2025

- Built NLP and recommendation models for client projects, tracking their performance with MLflow.
- Automated data pipelines and served model predictions through Flask and FastAPI APIs.

Web Development Intern, *Future Power Company, Karachi* Jul 2024 – Aug 2024

- Built the company website with React and Node.js.

Projects

Voice AI Patient Registration Agent *FastAPI, Vapi, PostgreSQL* · GitHub · Live demo
A phone agent that registers patients through natural conversation, with a REST API and a live dashboard.

Support Ticket Resolution Agent *LangGraph, Gemini, FastAPI* · GitHub · Live demo
A LangGraph workflow that drafts support replies, checks them against rules and escalates when needed.

Smart Attendance System *OpenCV, ONNX Runtime* · GitHub
Face-recognition attendance from a CCTV camera that records when each person arrives and leaves.

Source-Code Vulnerability Detection with Graph Neural Networks *PyTorch Geometric* · GitHub
Final-year research: a GraphSAGE model that flags vulnerable C/C++ functions from their syntax trees.

Skills

AI and ML: LLM agents (LangGraph, LangChain), retrieval-augmented generation, computer vision, PyTorch, TensorFlow, scikit-learn, Hugging Face

Engineering: Python, SQL, JavaScript, FastAPI, Flask, PostgreSQL, MongoDB, Playwright

Deployment: Docker, Linux servers, GitHub Actions, Vercel, Hugging Face Spaces, MLflow, AWS, GCP

Education

B.S. Computer Science, Sukkur IBA University, CGPA 3.16 / 4.00 2021 – 2025
F.Sc. Pre-Engineering, Govt. Islamia Science College 2019 – 2021

Achievements

- Winner, Robo War Competition, SIBA Test, Sukkur IBA University (2025)
- Second place, Cyber Security Hackathon Workshop, Ignite
- Organising member, Tech Fest, Sukkur IBA University
