Karachi, Pakistan

Professional Summary

AI/ML Engineer and Data Solutions Specialist with a strong blend of machine learning, data engineering, and automation expertise. Experienced in building end-to-end AI systems, real-time ETL pipelines, and production-grade data workflows. Proven track record delivering measurable impact, including 94% + accuracy models, large-scale SQL optimizations, and automated pipelines supporting analytics and enterprise operations. Passionate about scalable architecture, clean engineering, and shipping solutions that work.

Core Competencies

- **Machine Learning & AI**: Supervised/Unsupervised Learning, CNN, RNN, LSTM, GNN, Transfer Learning, Transformer Models
- **Applied AI & Automation**: End-to-End AI Model Development, Workflow Automation, Computer Vision, NLP, Generative AI, Document Intelligence
- **LLM Frameworks & Agents**: LangChain, LangGraph, GitHub Crawler Development
- **Data Science Tools**: Pandas, NumPy, SciPy, scikit-learn, Matplotlib, Seaborn
- **Deep Learning**: TensorFlow, PyTorch, Keras
- **MLOps & Deployment**: Flask, FastAPI, MLflow, Docker, Kubernetes, Git, VPS Deployment
- **API & Web Integration**: REST APIs, Laravel Portal Integration, AI Service Integration
- **Data Engineering**: Feature Engineering, SQL, MongoDB, PostgreSQL, Boomi, Postman.
- **Cloud Platforms**: AWS, GCP

Professional Experience

AI Engineer — Gems Pathways **Jul 2026 – Present**

- Design, develop, and optimize AI and machine learning models for educational and business applications.
- Automate complex and repetitive workflows using AI-driven solutions to improve efficiency and reduce manual effort.
- Build production-ready AI services and REST APIs using Python, Flask, and FastAPI.
- Deploy, configure, and maintain AI models and backend services on VPS environments using Docker and Linux-based infrastructure.
- Integrate AI-powered services with Laravel-based portals and websites in collaboration with backend and frontend development teams.
- Monitor deployed models, troubleshoot integration issues, and improve system performance, reliability, and scalability.

Junior Solution Engineer — Squarera, Karachi **Oct 2025 – Jun 2026**

- Developed and automated enterprise ETL pipelines using Boomi, improving data flow reliability and reducing manual data handling.

- Optimized complex SQL transformations, resulting in faster queries and cleaner analytic-ready datasets.
- Collaborated with engineering teams to design maintainable, high-performance data architecture.

Freelance Data Scientist (Machine Learning / Deep Learning) — Online Dimensions (Remote) Jul 2024 – Jun 2025

- Designed and deployed NLP and recommendation models achieving 94%+ accuracy with 40% faster inference.
- Automated ML pipelines for 500k+ records, cutting preprocessing time by 30%.
- Built REST APIs (Flask/FastAPI) serving predictions in <200ms.
- Optimized performance using ROC-AUC, cross-validation, and confusion matrices.
- Collaborated with stakeholders to turn business needs into deployable AI solutions.

Web Development Intern — Future Power Company, Karachi Jul 2024 – Aug 2024

- Built a full-stack corporate website with React & Node.js, boosting inbound leads by 25%.
- Automated email workflows with Nodemailer, cutting manual response time by 50%.
- Improved UX responsiveness, increasing session time by 18%.

Key Projects

AI-Powered Source Code Vulnerability Detection — Line-level C/C++ vulnerability detection with ASTs, GNNs, and RNNs. Achieved 96% precision and integrated with CI/CD pipelines.

GitHub Crawler (GitHub Actions + Postgres) — Automated crawler using GitHub Actions and Python to collect repository star counts via GitHub GraphQL API and store them in PostgreSQL for analytics and monitoring.

Support Ticket Resolution Agent (LangGraph + Gemini) — Built an AI-powered agent using LangGraph and Google Gemini API to automate support ticket processing, response generation, and workflow orchestration.

Hybrid Music Recommendation System — Combined collaborative filtering & deep learning, improving recommendation relevance by 35% on 1M+ user-song dataset.

CNN-Based Audio Classification System — Built and deployed audio classifier (94% accuracy) with FastAPI, processing audio clips in <3s.

Fake News Detection Platform — Binary classifier (Logistic Regression, LSTM) achieving 95% F1-score on 50k+ articles, deployed via web dashboard.

LangChain + Google Gemini Image Analysis Pipeline — AI pipeline for image captioning in <2s using LangChain + Google Generative AI APIs.

Education

B.S. Computer Science — Sukkur IBA University 2021 – 2025
F.Sc. Pre-Engineering — Govt. Islamia Science College 2019 – 2021

Achievements

- Won **Robo War Competition** at **SIBA Test**, Sukkur IBA University (2025).
- Secured **2nd Position** in **Cyber Security Hackathon Workshop** organized by Ignite.
- Served as an **Active Member** in organizing **Tech Fest** at Sukkur IBA University.
